### Profile

I am a proficient web developer with expertise in creating responsive and visually appealing websites using HTML, CSS, JavaScript, and Bootstrap. I am capable of building interactive and dynamic web applications.

### Education

**Bachelor Of Computer Application,** *Mazhar Uloom College* 2020 – 2023  
Ambur, India

**HSC,** *Mazhar Uloom Higher Secondary School* 2019 – 2020  
Ambur, India

### Professional Experience

**Web Developer (Internship)** 2023 Aug – 2024 Feb

As an intern at Aspira System, I have been actively involved in web development projects, gaining valuable hands-on experience in HTML, CSS, JavaScript, Bootstrap, Git, SQL, and object-oriented programming (OOP) in JavaScript. Working under the guidance of senior developers, I have contributed to the design, development, and maintenance of responsive and user-friendly websites.

### Skills

- HTML5
- JAVASCRIPT
- GIT
- OOP
- CSS 3
- BOOTSTRAP
- SQL
- RESPONSIVE WEB DESIGN

## Projects

### PORTFOLIO

- Professional Portfolio Design: Developed a professional and visually appealing portfolio website to showcase skills and projects effectively.
- Responsive Web Design: Ensured the website is responsive, adapting seamlessly to different devices for enhanced user experience.
- Creative CSS Usage: Utilized CSS animations and transitions for a visually engaging design.
- HOSTED LINK:<https://samiporfolio12.netlify.app/> 

### RESTAURENT

- Customized Design: Developed a custom website design tailored to the restaurant's branding and style, creating a unique online identity that reflects its ambiance and cuisine.
- Interactive Features: Utilized JavaScript to create interactive elements such as dynamic menus, image galleries, and reservation forms, enhancing the website's interactivity and user engagement.
- Responsive Web Design: Implemented responsive design principles to ensure the website is accessible and functional across various devices, improving accessibility and user satisfaction.

### WEATHER FORECAST

- Location-based Forecast: Developed a feature that allows users to input their location or choose from a list of predefined locations to view weather forecasts specific to their area of interest.
- Real-time Weather Data: Implemented a system to fetch and display real-time weather data from reliable sources, providing accurate and up-to-date information to users.
- Multiple Weather Parameters: Displayed a comprehensive range of weather parameters such as temperature, humidity, precipitation, wind speed, and forecast conditions, providing users with a detailed overview of the weather conditions.
